Summary

Full-Stack Developer specializing in the MERN stack, with hands-on experience building and deploying real-world web applications. Proven ability to develop scalable backends, responsive frontends, and secure REST APIs. Strong problem-solving mindset with a focus on performance, clean code, and delivering production-ready solutions.

Projects

Full-Stack User Management System (MERN)

June – July 2025

- Built a full-stack CRUD application using MongoDB, Express.js, React, and Node.js.
- Implemented user management features with optimized backend and validation.
- Developed responsive UI ensuring smooth user experience.
- Designed secure REST APIs with proper error handling.
- **Live Link:** View Project
- **GitHub:** Repository

Cipher Studio React Compiler Application

Nov – Dec 2025

- Developed a React-based online compiler with real-time JSX output.
- Integrated Babel for client-side compilation and secure rendering.
- Created interactive and responsive UI for enhanced coding experience.
- **GitHub:** Repository

Technical Skills

Languages: Python, C/C++, JavaScript, HTML, CSS

Frameworks: React, Node.js, Express.js

Databases: MongoDB, SQL

Tools: Git, GitHub, VS Code

APIs: REST APIs, OpenAI API

Certifications

Software Testing Certification – Coursera

Full Stack Development – Cipher Schools

Big Data Capstone Project – Coursera

Cloud Computing – NPTEL
