Summary

Full-Stack Developer specializing in the MERN stack with hands-on experience building and deploying real-world applications. Skilled in creating responsive UI, scalable backend systems, and secure REST APIs with a focus on clean and efficient code.

Projects

Full-Stack User Management System (MERN)

June – July 2025

- Built a full-stack CRUD app using MongoDB, Express.js, React, and Node.js.
- Implemented validation, optimized backend, and responsive UI.
- Designed secure REST APIs with error handling.
- **Live:** View Project
- **GitHub:** Repository

Cipher Studio React Compiler Application

Nov – Dec 2025

- Developed a React-based compiler with real-time JSX output.
- Integrated Babel for client-side compilation and secure rendering.
- Built interactive and responsive UI.
- **GitHub:** Repository

Technical Skills

Languages: Python, C/C++, JavaScript, HTML, CSS

Frameworks: React, Node.js, Express.js

Databases: MongoDB, SQL

Tools: Git, GitHub, VS Code

APIs: REST APIs, OpenAI API

Certifications

Software Testing – Coursera
